Speaking Topics

Hope for the Homelessness Reduction Act

The HRA Act is at the forefront of all discussions within Local Authorities. LAs are turning to software to mitigate the impact and risks connected with added paperwork and increased number of cases.

This talk describes how our HOPE software can help to prepare and deliver the HRA Act much more easily.

Moving out of borough made easy

As the amount of available social housing decreases, and as demand increases, local authorities are having to consider ways of helping their applicants. Seeking to provide insights on how this oft-discussed challenge can be tackled, this talk provides examples of how to expand housing options through existing unused property supply and case management.

Bio

The serial innovator in social housing software applications and founder of Home Connections - Ninesh established and has led Home Connections for over 15 years. Possessing in-depth knowledge of Social Housing Issues, Information Technology, Social Services and Social Enterprise on a European level. His expertise helped to shape Home Connections as a European Award winning customer-focused service with an emphasis on access for vulnerable home seekers.

About Home Connections

Home Connections delivers the most innovative housing software to over 100 local authorities and housing associations across the UK.

About Homefinder UK

Homefinder UK is the only national housing mobility scheme in the UK which advertises immediately available social housing and offers 'Case Management' services to help house applicants nationwide.
